

1st International Conference on Structural Engineering Research(iCSER2017)

20-22 Nov 2017, Sydney, Australia

CONFERENCE INFORMATION

The **1st International Conference on Structural Engineering Research, Sydney, 2017 (iCSER 2017)** will bring international and national experts in structural engineering research and practice to Sydney to present and share their latest research and practice. iCSER 2017 will be held in Sydney, which is one of the largest cities in Australia. The conference is supported by Global Circle for Scientific, Technological and Management Research (GCSTMR) and Science, Technology and Management Crest, Australia (STAMCA). GCSTMR endeavors to create a platform for young researchers to exchange ideas and share information with experts in their respective fields. GCSTMR encourages and facilitates trans-national collaborations among its members and associates in research, training and professional activities. Multidisciplinary international conference series run by GCSTMR open vast opportunities for researchers to interact on the global platform and take advantage of knowledge sharing in the digital arena.

iCSER 2017 will be held at Western Sydney University's Parramatta Campus, which is situated 20 km from the Sydney CBD and is well connected by rail, road and ferry networks. The traditional landmarks of Sydney including Sydney Harbour, Sydney opera house and Harbour bridges are within easy reach of the conference venue as is the Blue Mountains World Heritage National Park.

iCSER 2017 will feature keynote addresses by world leaders in structural engineering fields. It will cover a wide range of areas within structural engineering research and practice where leading researchers as well as new researchers will be able to exchange their views and ideas on structural engineering. All the submitted abstracts and full papers to iCSER 2017 will be reviewed by two independent reviewers and if accepted will be published in proceedings of the conferences with Australian ISBN Number.
